ALL PHASE COMMUNICATIONS REPORTS STRONG INCREASE IN TECHNOLOGY INVESTMENT FOR 2012

Leading Unified Communications Provider Helps Customers Position for Growth

SEATTLE, WA — February 22, 2012 — All Phase Communications, an industry leader in unified communications, announced today that the outlook for technology purchases by small to mid-sized (SMB) companies in 2012 is exceptionally positive. This outlook was confirmed by Technology Assurance Group (TAG), an international association of unified communications providers representing approximately \$350 million in products and services. As a premier Member of TAG, All Phase Communications is positioned as the dominant force in their marketplace and is able to better prepare and protect its customers for whatever the future holds.

Many small to medium-sized businesses (SMBs) are starting off the New Year by deploying advanced technology in order to secure a competitive advantage early on. Today's SMB needs to be more agile, efficient and better equipped to handle the challenges that 2012 will bring and many business owners are creating a gap between themselves and their competitors by implementing the

technology offered by All Phase Communications'. "Every sector is experiencing different growth rates, but when we step back and look at the big picture, it becomes clear that overall demand is up, and businesses need to have the tools necessary to gain a foothold in their industry," stated Dale Stein, Co-Founder of TAG.

All Phase Communications' unique relationship with TAG, enables them to adopt cutting edge best business practices, deliver innovative programs, and partner with elite technology manufacturers and application service providers. Over the years, All Phase Communications has leveraged this relationship to consistently deliver benefits to their customers that are simply unavailable to other technology providers. For example, All Phase Communications is able to leverage the buying power of approximately 130 technology providers to receive deep discounts from manufacturers, and provide a lower cost to the customer. The bottom line of this partnership is that All Phase Communications is better positioned to enhance employee productivity and increase profitability than any other technology provider in the market.

"We continue to be impressed with All Phase Communications' stern commitment to their customers. At the end of the day, business owners are concerned with the bottom line and new technology is pointless if it doesn't increase your overall profitability," commented Stein. "All Phase Communications has always focused on this fact and it shapes their recommendations and suggestions when working with their clients. As a result of this approach, their customers continue to thank them and I see a very bright future for All Phase Communications," added Stein.

With growth opportunities on the horizon in 2012 many businesses are looking for ways to prepare for the large influx of sales they expect to see. This change will be driven by macroeconomic factors, but will be sustained by a business's ability to keep up with demand. Many businesses are investing heavily in technology and enlisting the help of elite technology providers like All Phase Communications to make sure that whenever that wave of sales arrives, they're ready to ride it all the way to the bank.

ALL PHASE COMMUNICATIONS

Founded in 1986, All Phase Communications is a customer-service oriented telecommunications company with more than 20 years experience in the industry. All Phase is a preferred installation provider with leading VoIP (Voice over Internet Protocol) technology partners including ShoreTel and Toshiba. As the name suggests, All Phase handles all phases of VoIP installation including network assessment, system design, project management, system implementation, system deployment and training, and system maintenance. Based in

Shoreline, Washington, small, medium and large companies including City of Bellingham, Glacier Fish, Cutter & Buck, Cascade Valley Hospital and Clinics, Ben Bridge Jewelers have relied on All Phase for their VoIP expertise to gain a competitive advantage in the marketplace by reducing operating costs, streamlining customer service, and improving productivity.
