

PRESIDENT OF ALL PHASE COMMUNICATIONS INVITED TO CONVENTION RESERVED FOR INDUSTRY LEADERS

Rick Giddens, President of All Phase Communications, to Share His Vision on the Future of Unified Communications

SEATTLE, WA — May 24, 2012 — All Phase Communications, a leading provider of unified communications, announced today that President, Rick Giddens, has been invited by Technology Assurance Group (TAG), an international organization representing nearly \$350 million in products and services in the industry, to share his vision on the future of unified communications with some of the industry's top manufacturers, vendors, suppliers and resellers at TAG's national convention. The 12th Annual TAG Convention will be held in New Orleans, Louisiana on September 9th-12th.

With more and more businesses headed to the cloud, networking and IT infrastructure has grown substantially more complex in the past year. Today's unified communications providers require unprecedented levels of technical expertise, industry foresight and customer service in order to remain competitive. All Phase Communications has been invited to attend this year's convention due to its superiority in each of these areas.

"All Phase Communications has dominated their marketplace for quite some time," states Brian Suerth, Executive Vice President & Partner of TAG. "They are continually striving to stay on the leading edge of technology, and that's why no one can compete with them. All Phase Communications knows what's coming down the pipeline and how it's going to ultimately affect their customers. That's why they are able to

proactively support their customers and implement powerful technologies before their competitors even realize that they're behind the curve."

Several industry topics will be covered at the convention and best business practices will be revealed in areas ranging from cloud technologies, virtualization, hosted solutions, managed IT services to customer service. "The only constant in life is that it never stops changing. It's no different in our industry," commented Rick Giddens, President of All Phase Communications. "That's why we continue to remain active in the industry and share our views at these kinds of events. We always come back to the office with something new and valuable that we can pass on to our customers. We're passionate about what we do and we feel that it's our duty to our customers to find out what's on the horizon. We're often able to leverage new developments and find ways to boost our customers' productivity, and more importantly, their bottom line profitability."

All Phase Communications is among the top unified communications providers in the nation and its success is due largely to its innovative approach to business.

ABOUT ALL PHASE COMMUNICATIONS

Founded in 1986, All Phase Communications is a customer-service oriented telecommunications company with more than 25 years experience in the industry. All Phase is a preferred installation provider with leading VoIP (Voice over Internet Protocol) technology

partners including ShoreTel and Toshiba. As the name suggests, All Phase handles all phases of VoIP installation including network assessment, system design, project management, system implementation, system deployment and training, and system maintenance. Based in Shoreline, Washington, small, medium and large companies including City of Bellingham, Glacier Fish, Cutter & Buck, Cascade Valley Hospital and Clinics, Ben Bridge Jewelers have relied on All Phase for their VoIP expertise to gain a competitive advantage in the marketplace by reducing operating costs, streamlining customer service, and improving productivity.

ABOUT TECHNOLOGY ASSURANCE GROUP (TAG)
